Vienna: 2012/08/30

Our signation: GM

**PVC granule production including
PVC-pipes production Ø 40 – 110 mm
PVC-panels production 100, 125 and 250 mm
add. PVC-water hoses production ¼", ½", ¾" and 1"**

PVC – granule production:

It will be able to produce with our systems PVC granules of different quality, depending from the raw materials PVC powder and fillers. The plant gives you the opportunity to produce in the connected extruder 500 kg granule in hot mixing process and 2000 kg granule in cold mixing process.

All units are used equipments but in good condition.

We sell not only equipments, we sell also "know-how" and "technology".

Company data: HRB-Wien FN 65804; Id. Nr.: ATU 40280209 [IBAN code: AT 46322500000201608](#)
Bank account: Raiffeisenkasse Guntramsdorf, Branch Laxenburg, Account Nr. 201608 Bank Code: 32250
We point out that the goods will remain our property until full payment

It's possible to produce from these granules the following products:

PVC-pipes production Ø 40 – 110 mm

With two extruders it will be able to produce PVC-pipes in the diameter 40 mm to 110 mm. These pipes are ideal for installation of water lines. They have a high strength and they are temperature resistant.

All units are used equipments but in good condition.

We sell not only equipments, we sell also “know-how” and “technology”.
