

Option HMS

Transportable plant for mixing and filling of several cleaning products starting from concentrates which are delivered in 5 l, 10 l, 20 l, 100 l and 200 l cans.

Variable filling sizes of the finished product: 0,5 – 100 litre.

HMS - Products

Directly from the concentrate **only by adding water and salt!!**
Take profit from our many years of international **experience and research and development.**

Using the HMS –HOME MIXING STATION you can produce up to 100 different products, like:

- Householdcleaners**
- Body care products**
- Cleaners**
- Car care products**

Flexible – for less money – environment friendly – high international quality standards

HMS – Target groups

HMS – is the smallest option of the filling and production plants of the BEFA Systems

Target groups are:

- small regional cleaning companies
- Merchandisers and vendors for the distribution of their own brands
- Local retail chains for the distribution of their own brands
- Multi Level Marketing – systems for the distribution of their own brands
- Hotels and holiday resorts for their own cleaning use
- Industrial companies for their own cleaning use

HMS - Advantages

- Low investment
- start production within short time
- up to 100 different products possible
- No chemical know-how necessary
- All (concentrates, bottles, caps, labels) from one supplier
- Less production space and normal power connection
- Possible to be handled by only one person
- High quality and environmentally friendly products
- Flexible to fill different bottle sizes and cans
- Low transport and storage costs through delivery to you of concentrates instead finished products
- No custom duties as concentrates are prepared regionally and distributed within one country or custom free area
- **High profit margin through avoiding costs of producers and wholesalers!**

HMS – Home mixing Station

TECHNICAL DETAILS:

- Measurements: 1200 x 800 x 1200 mm
- Support: mounted on a metal plate
- Weight of the plant: approx. 100 kg
- Power supply: 230 V/50 Hz
- Energy consumption: 1,2 kw
- Mixing volume: 100 litre

Capacity with filling pipe: 100 pcs of 1 Litre bottles per hour
Bottle size with Filling pipe: 0,5 Litre to 5 Litre

Capacity with valve (for cans): 33 litre per minute
Can size with filling over valve: 5 Litre to 100 litre

HMS work cycle description

Mixing tank with 100 liter volume

0,5 – 5 Liter volume over height adjustable filling pipe

Filling of **large containers** with a volume of **5 – 100 Liters** using the integrated pump

Labelling machine (label donor)

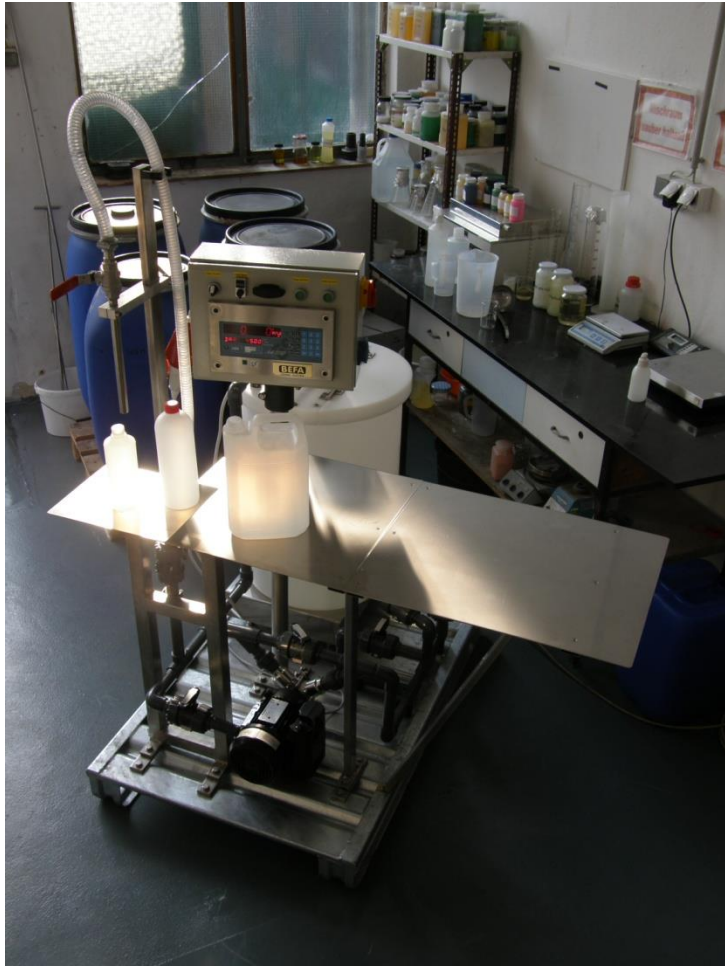

HMS-Innovation

- **Compact production unit**
- **Variable and flexible**
- **Low requirements**
- **Starting plant
with low investment costs**
- **Complete package as franchise**
